SOFTWARE ENGINEER

High-energy programmer and team player with a proven track record of building **high-retention products**. Background includes scripting in C# and Python, web development in React, and engineering in performance-critical C++. Hands-on experience with many different technology stacks, ranging from graphics programming to data analytics.

EDUCATION

DePaul University, Chicago IL - Bachelor of Science, Computer Science, GPA: 3.67/4.00

PROFESSIONAL EXPERIENCE

C# Developer 03/2025 - Current

Mentia.me

- Spearheaded 3d animation retargeting efforts leveraging Unity-side IK Rigs for making 3d assets reusable.
- Ensured 3d asset quality and developed standards for asset pipeline.
- Coordinated with cross-functional teams to integrate assets.

Instructor 10/2024 - 3/2025

GameU

- Taught a wide range of technical skills to young students part time, including HTML/CSS/JS.

Programmer I 2/2022 - 10/2023

Disbelief

- Resolved graphics and UI issues for Minecraft's RenderDragon release in C++ such as cascading shadow maps and UI Z-fighting
- Nativized Blueprint scripts to C++ to support dependency breaking, slashing editor load times

Lua Programmer 8/2020 - 12/2021

Playmake

- Developed new features in Lua for Live-Service Roblox game "Murder Party"

TECHNICAL SKILLS

- Languages:
 - C++
 - C#
 - Python
 - HTML/CSS/Typescript
 - Lua
 - GLSL
- Web Frameworks
 - React
 - Vue.js
 - FastAPI
- Project Management
 - Jira
 - Trello
- IDEs
 - Visual Studio
 - VS Code
- Version Control
 - Git
 - Perforce
- Databases
 - Supabase (PostgreSQL)

- Handled new feature implementation from conception, to implementation, to polish
- Built a hex-tile module for the game lobby floor using axial coordinates
- Developed reusable modules for building screen-space elements, and debugging.
- Weekly customer reviews - analyzed KPIs such as day-1 retention and conversion rate
- Shipped a project that achieved **top-of-the-platform retention**
-

Somasim 1/2020 – 5/2020

UI Programmer

- Enforced formatting standards across UI elements
- Extended overlay systems to accommodate new functionality in C#

Junior Associate Software Engineer 4/2019 – 12/2019

NetherRealm Studios

- Ported file parsing C++ program to C#, provided class design and implementation
- Built a custom particle system module in C++ for Unreal Engine that skews random property distribution
- Built an image processing script in Python to compare chrominance and luminance values
- Built web dashboards using Vue.js components for player data, handling asynchronous RESTful APIs.

Developer 8/2019 – 11/2019

American Medina

- Shipped *American Medina*, a Chicago History Museum Exhibit in C#, featuring a custom editor for multilingual text application
- Architected the framework for deploying multiple versions of the build from the editor

Undergrad Researcher 09/2018 – 06/2019

DePaul University

- Implementation of sloped 3D platform movement.
- Built a C++ multi-vertex trail system for level designers to place trails in the game world using the editor

Software Engineer Intern 11/2018 – 2/2019

Phosphor Studios

- Handled refactors and bug fixes for Unreal Engine mobile game *Days of Doom: Heroes United*
- Interacted with Playfab account data to resolve issues

PROJECTS

That Time I Got Trapped In An Office Dungeon - Gameplay / Audio / Shader Programming November 2024 - Present

- Featured in [itch.io's Top 20 Games of November 2024](#) video
- Achieved **100,000** plays on [gx.games](#)
- Wrote custom CRT shader with chromatic aberration, fisheye, vignette, and static

Capstone Project - Team Lead August 2019 - Sept 2021

- Lead multidisciplinary team in building a networked card game in Unity using the Lidgren framework
- Lead sprint planning, mechanical design, sound design, network engineering

CERTIFICATIONS

CompTIA A+ Certification Sept 2024

RECOGNITION AND INTERESTS

Young Entrepreneurs Academy Regional Winner - 2015

- Developed a business model for a paid-mod subscription service for games.

Volunteer Mentor - 2017

- Hosted by DePaul and the Chicago Housing Authority, assisted in teaching digital media skills to youth.
